EDUCATION

University of Auckland | Bachelor of Engineering (Hons.)

2023 – 2026

- **GPA: 8.0/9.0** (A/A+ Average)
- **Dean's Honour List 2024** (Top 5% of Cohort)
- Final Year (Part IV), Software Engineering Specialisation

EXPERIENCE

TRV Trading | C++, Java, Python, ClickHouse, Docker

Auckland, NZ

Software Engineer (Part-time)

Feb. 2026 – Present

- Rearchitected a distributed backtesting cluster across the firm's workstations, cutting a single backtest from three days to a few hours and making it a reliable shared service for the quant research team.
- Reworking backtest execution to reproduce live trading conditions, closing the gap between backtested and realised strategy performance.

Software Engineering Intern

Nov. 2025 – Feb. 2026

- Designed and built a ClickHouse time-series store holding terabytes of market and event data, and the C++ pipelines that ingest and transform decoded ITCH and historical data for global derivatives markets.
- Containerized a proprietary C++ market data viewer and integrated it with a database pipeline for live and historical data, replacing file-based workflows.

Alimetry | Swift, SwiftUI, Python

Auckland, NZ

Software Engineering Intern

Nov. 2024 – Feb. 2025

- Developed components and screens for Alimetry's iOS application using SwiftUI, improving the modularity of the codebase and the user's experience.
- Built an internal tool to automate data modification workflows, enhancing efficiency for other developers.

PROJECTS

Jemberry | Next.js, PostgreSQL, Stripe

Jan. 2026 – Aug. 2026

- Built and deployed a full-stack e-commerce site with authentication, an admin dashboard for product and order management, and Stripe checkout, processing thousands of dollars in transactions since launch.

Blackjack | C++, Docker

Mar. 2026

- Designed and implemented a modular, object-oriented Blackjack engine with clear separation between game logic and input/output layers.

SignSafe | Python, PyQt5, PyTorch, OpenCV

Mar. 2025 – May 2025

- Developed a sign language interpreter app using Python and PyQt5 and three machine learning models: AlexNet, EfficientNet and a custom ResNet.

EXTRACURRICULAR

Web Development and Consulting Club

Industry & Competitions Executive

Nov. 2024 – Present

- Planned and organized hackathons and other competitive events, managing participants and event execution.

Hidden Treasure | Next.js, PayloadCMS, MongoDB, AWS

Technical Lead

Mar. 2025 – Dec. 2025

- Led a team of developers to build a scalable and user-friendly charity website, while guiding the team in React, Next.js, and modern web development best practices.

NZ Cyber Security Challenge

July 2024

- Ranked in the top 50 in the National round solving Capture The Flag (CTF) and system analysis challenges earning a place at the finals at Waikato University.

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript/TypeScript, Swift, Bash, SQL

Systems & Infrastructure: Linux/Unix, Docker, CMake, Git, CLI tooling, PostgreSQL, ClickHouse

Frameworks & Libraries: React, Next.js, SwiftUI, PyTorch, OpenCV
